## Testing, Vaccines, Treatment, and websites in Doña Ana County, NM as of 11/10/2022

### COVID-19 Treatments

Find a Provider for COVID Treatment Evaluation:

<https://cv.nmhealth.org/providers/treatment-evaluation/>

Current Participating Pharmacy Locations for Treatments:

<https://cv.nmhealth.org/current-participating-pharmacy-locations-for-oral-therapeutics/>

### Types of Tests

PCR (Polymerase chain reaction)- PCR (polymerase chain reaction) tests are a fast, highly accurate way to diagnose certain infectious diseases and genetic changes. The tests work by finding the DNA or RNA of a pathogen (disease-causing organism) or abnormal cells in a sample.

<https://medlineplus.gov/lab-tests/pcr-tests/>

Self-Test or At-Home Test (Antigen tests)- At-home COVID-19 antigen tests detects proteins, called antigens, from the SARS-CoV-2 (the virus that causes COVID-19). At-home COVID-19 antigen tests are less likely to detect the SARS-CoV-2 virus than molecular tests, such as polymerase chain reaction (PCR) tests.
